Product Catalog and Ordering Information

Drop Cable Stripping

CPT Cable Stripping Tools

strip the jacket and cut back the braid and dielectric from RG-6, -59, -7, and -11 cables, including plenum-rated and mini cables as well!

- **Hardened tool-steel blades** strip jacket and cut back braid and dielectric in one smooth operation to prepare cable quickly.
- **Patented clean-out feature** removes debris during use for easy clean-up.
- **Pre-calibrated cartridges** ensure proper strip dimensions.

CPT-1100

CPT-7538

CPT-6590

Super CPT™ Stripping Tools strip the jacket

and cut back the braid and dielectric from large- and small-diameter cables, including plenum-rated and Flex Feeder cables.

- **Two cartridge slots** make it possible to strip both large and small cables without changing tools or cartridges.
- **Quick-release mechanism** enables fast, safe cartridge changes.
- **Integrated insertion port** eliminates the need for a separate insertion tool.

CPT Cable Stripping Tools

CPT-6590	Prepares 6 and 59 Cable 1/4 x 5/16 prep (1 installed cartridge/one spare)
CPT-6590 SINGLE	Prepares 6 and 59 Cable 1/4 x 5/16 prep (1 installed cartridge)
CPT-6590S	Prepares 6 and 59 Cable 1/4 x 5/16 prep-w/stop
CPT-6590-1S	Prepares 6 and 59 Cable 1/4 x 5/16 prep-w/stop (1 installed cartridge)
CPT-6590TS	Prepares 6 and 59 PPC Tri-Shield 1/4 x 5/16 prep
CPT-6590PL	Prepares 6 and 59 Plenum Cable 1/4 x 5/16 prep
CPT-1100	Prepares 7 and 11 Cable 1/4 x 5/16 prep (2 cartridges)
CPT-1100 SINGLE	Prepares 7 and 11 Cable 1/4 x 5/16 prep (1 cartridge)
CPT-1100PL	Prepares 7 and 11 Plenum Cable 1/4 x 5/16 prep
CPT-1100-125	Prepares 7 and 11 Cable 1/8 braid prep
CPT-1250	Prepares 6 and 59 Cable 1/8 braid prep
CPT-59HEC2	Prepares CommScope 59 Quad Series Head End Cable 1/4 x 1/4 prep
CPT-7538	Prepares Belden Mini Cables 1/4 x 1/4 prep
CPT-7691	Prepares SCTE approved CommScope and Times Fiber Mini Cables 1/4 x 1/4 prep
CPT-TXFF-250	Replaced by SCPT-TXFF or SCPT-TXFF-6

Drop Installation Tool Kits

HCPT-6590	Includes CPT-6590 SINGLE stripping tool and HPT-6590 compression tool for 6 & 59 Cables
HCPT-1100	Includes CPT-1100 SINGLE stripping tool and HPT-1100 compression tool for 7 & 11 Cables

RBC-TXFF-250	CPT Replacement Blade priced per Each

*Not compatible with Super CPT.
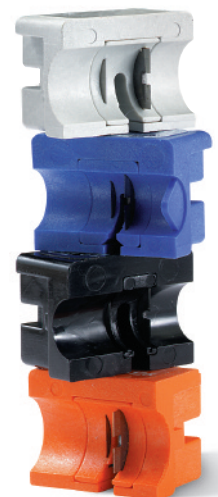

The leader of the pack.

The Cable Prep CPT Tool is the industry's best selling stripping tool.
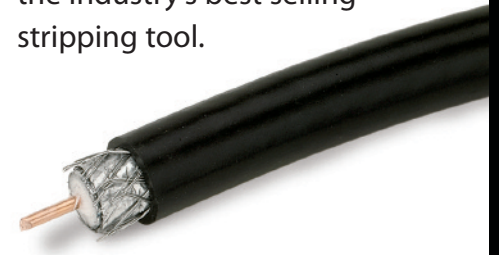

In one easy step, our CPT tools remove the right amount of cable jacket, cut the braid and dielectric to the proper length and expose the center conductor

The Super CPT has a connector insertion feature built into the body of the tool, adding to convenience and versatility

Replacement cartridges are color-coded to help identify the right tool for each specific application

Drop Cable Compression

Cobra 360 Compression Tool is highly affordable and productive, featuring a performance-driven design that delivers easy, powerful leverage and ensures consistent, precise connections, every time. A dual integrated connector support system and universal plunger tip attach **ALL** F-type compression connectors used on RG-6, -59, -7, -11 and mini coax cables.

- **Ergonomic, compact and sturdy design** can be operated easily and comfortably with either hand.
- **Patented and efficient self-releasing dogs** facilitate easy, one-handed cable insertion and removal while ensuring 360-degree connector support.
- **Magnetic, easy-release handle** closes the tool when not in use, protecting the tool and making it so compact it can be stored in a pocket – or an eyeglasses case.

COBRA-360
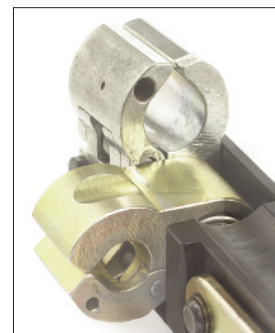

Brass-colored dogs used for RG-6 and -59 connectors swivel out of the way for RG-7 and -11 connections made with the silver dogs. One tool does it all – no field adjustments are required.

MCT Multi-Compression Tools utilize an innovative "Spin & Store" technology and attach all RCA, BNC and F-type compression connectors used on RG-6, -59, -11 and mini coax cables. The MCT weighs only 1.0 lbs.
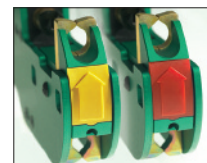

- **Universal plunger tips** support all connector types.
- **360-degree connector support** ensures uniform compression and prevents misalignment.
- **Efficient self-releasing dogs** facilitate easy, one-handed cable insertion and removal.

MCT-101

MCT-102

HPT-1100

HPT-BNC

HPT-6590
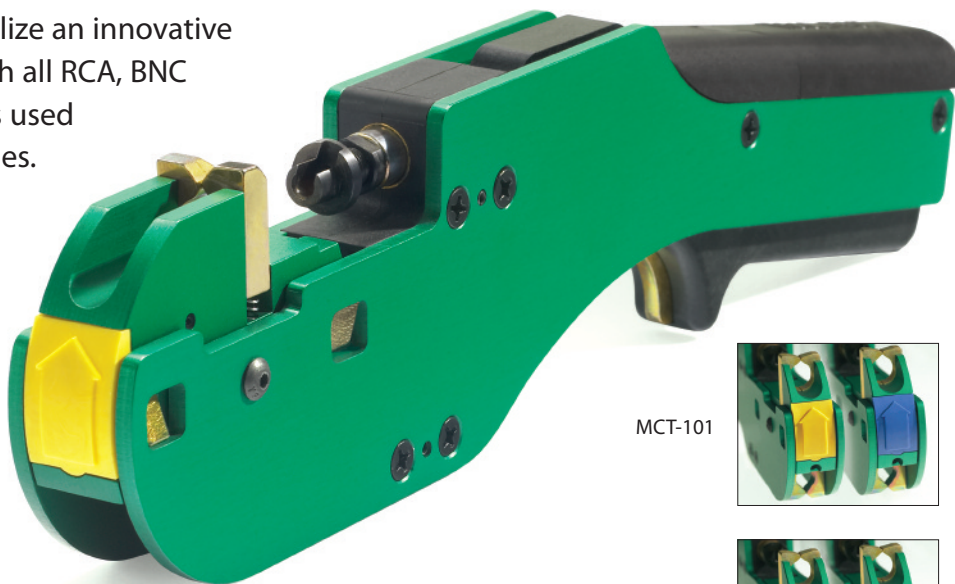

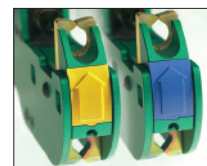

HPT Hybrid Pocket Tool Series

is "built tough" – constructed of reinforced high-performance polymer – and attaches all RCA, BNC and F-type compression connectors used on RG-6, -59, -11 and mini coax cables.

- ○ **Ergonomic and compact and lightweight design** can be operated easily and comfortably with either hand.
- ○ **Integrated insertion port** eliminates the need for a separate insertion tool.
- ○ **Improved tool locking mechanism** keeps handle secure during storage
- ○ **Patented and efficient self-releasing dogs** facilitate easy, one-handed cable insertion and removal while ensuring 360-degree connector support.

PIK the best!

The Cable Prep PIK Premises Installation Kit includes tools from our extensive line of products for "PIK" Series drop-cable applications. Choose your kit based on the application required.

If you don't see exactly what you need here, please contact us and we'll be happy to put together the combination of tools that fits your needs perfectly.

CC-series Cutters cut through the steel center conductor on all drop cables.

- **High-carbon forged-steel blades hold their sharp edge.**
- **Electronic coating prevents rust.**

CPT-6590 Cable Stripper strips the jacket and cuts back the braid and dielectric.

- **Pre-calibrated strip-back dimensions ensure proper connectorization.**

Hybrid Pocket Tool attaches any compression-type connector conforming to universal standard size.

- **Unique jaw design enables cable to be inserted or removed with one hand.**
- **Factory calibrated activator and gauge ensure accuracy.**
- **Combines the best features of our legacy compression tools with state-of-the-art composite materials**

**Torque Wrenches** prevent damage to equipment from over tightening or signal loss due to loose connectors.

- **Factory tested and guaranteed to provide consistent torque over the life of the tool.**

Drop Cable Accessories

CC Cable Cutters cut through the steel center conductor on all drop cables.

- **High-carbon forged-steel blades** hold their sharp edge, while electronic coating prevents rust.
- **Textured handles** provide a comfortable, firm grip.

CC-2008

CC-3008

Torque Wrenches prevent damage to equipment from over tightening or signal loss due to loose connectors.

- **Factory tested and guaranteed** to provide consistent torque over the life of the tool.
- **Color coded rings** for easy identification of different torque (inch pound) settings.
- **Knurled tool body** provides a gripping surface to ensure a firm hold during use.

Torque Wrenches

Carpet Cutter and Drill Guide cuts easily through carpet and pad for drop installations.

- **Serrated blade edge** cuts with one-handed twisting motion.
- **Drill guide** eliminates "snow-ball" effect.
- **Pass-through design** accommodates up to a $7/16$" drill.
- **7/16" by 8" drill bit** is available.

Because a replaceable plug ensures a "perfect fit" should the drop location change, this tool goes a long way toward ensuring customer satisfaction.
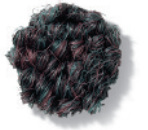

Hard Line Stripping & Coring

SCT Stripping/Coring Tools strip back and bevel the outer conductor and core the dielectric on 0.412" through 1.000" hard-line cables, including PIII, T10, TX10, CommScope Power Feeder, Times Fiber 50-ohm, PB10, MC^2, QR, and comparable HFC cables.

- **High-alloy steel** ensures long blade life and optimum performance.
- **Dual-edged one-piece blade** guarantees correct blade alignment.
- **Stripping, coring, and beveling in one step** speeds connectorization.
- **Beveled outer conductor** prevents O-ring damage and minimizes water migration.

SCT-500ALU

SCT-750

SCT-F320QR

AIO All-In-One Cable Preparation Tools simultaneously strip back the jacket, core the dielectric, strip back and bevel the outer conductor, and measure and bevel the center conductor on 0.412" through 0.875" coaxial cables. Can be used in place of JCS and SCT tools.

- **Cone-shaped cable entry** reforms flattened cable as it is pushed into the stripper.
- **Perfectly aligned cutting edges** hold a sharp edge over a long life.
- **Adjustable center conductor stop** also bevels the conductor during coring.
- **Open body and blade design** allows debris to fall freely during operation.

The SCT-QR-B supports the outer conductor by utilizing the patented mandrel pin during the jacket-stripping operation. The patented QR blade bevels the outer conductor to eliminate O-ring damage and prevent water migration. Our cable GATOR® can be used to remove the dielectric from the center conductor and to bevel it in two easy steps. Please see the Hard Line Accessories page for more details on the GATOR.

Replacement Parts for Coring and Strip/Core Tools

Ratchet Handles in 4.5-inch and 8-inch lengths available for all SCT, SCT-ALU, QR, MC2 & PB10 Strip/Core tools.

Color-coded Guide Sleeves

Replacement Blades available for all SCT, SCT-ALU, QR, MC2 and PB10 Strip/Core tools.

Replacement Blades for All-In-One tools available in a full kit, or sold individually. Please see website for details, or call us directly!

Hard Line Stripping

JCS-750

JCS-412

JCS-500

JCS Jacket Stripping Tools strip the jacket on 0.412" through 1.160" hard-line cables, including PIII, T10, TX10, and comparable HFC cables and QR, MC^2, and CommScope® double-jacketed cables.

- ⊙ **Dual-edged blade** cleanly removes the jacket.
- ⊙ **Heat-treated steel** prolongs the blade's life.
- ⊙ **Knurled tool body** ensures a positive grip.
- ⊙ **Color-coded guide sleeve** facilitates identification.

MRT-1SFA

MRT Messenger Removal Tools separate the messenger from the main hard-line cable.

- ⊙ **Spring-loaded blades** remove exactly the right amount of messenger.
- ⊙ **Unique pivoting action** ensures a clean cut.
- ⊙ **Safe features** mean hands won't get cut.

ART Armor Removal Tools strip the armored jacket from CommScope PIII, QR, and Cable Guard® sub-surface cables.

- ⊙ **Multiple angles on steel blades** aid lifting and provide a clean, accurate cut.
- ⊙ **Safety feature** keeps removed armor coil away from user's hand.
- ⊙ **Knurled color-coded bodies** ensure a tight grip and time-saving performance.

JCS-1125QR	Jacket Stripper for QR Cable

Guide sleeves protect the outer conductor and act as a visual guide for cable sizes. The sleeves are color-coded to match our companion stripping/coring tools.

The MRT blade is spring-loaded and can be easily released. This enables the tool to slide without damaging the web and facilitates removal of a precise length of messenger.

A larger-diameter knurled body provides a better grip and increased torque, as indicated by this ART-500CG tool for the CommScope® CableGuard® product.

Hard Line Accessories

GATOR

Gator® Center Conductor Beveler and Cleaner bevels the center conductor and cleans the bonded dielectric after coring any hard-line cable.

- **Ergonomic handle** makes tool easy and comfortable to use.
- **Reversible teeth** guarantee exceptional performance over a long life.
- **Integrated beveller** removes burrs that can damage connector's seizing mechanism and tool's cleaning edge..
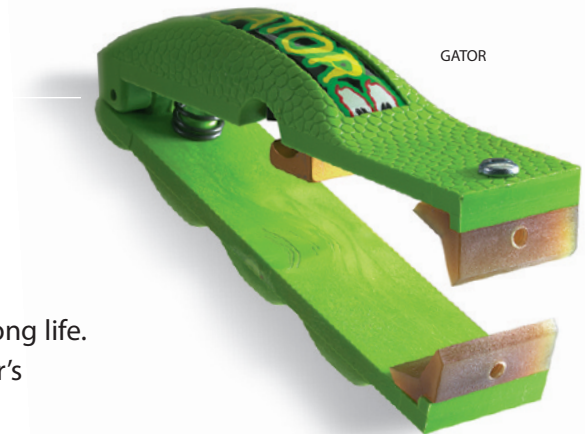

CC8002 Cable Cutters cleanly cut all hard-line cables up to 1" in diameter.

CC8002

- **Perfectly mated cutting edges** do not distort or crimp the cable.
- **Precision-ground steel blades** offer long-lasting sharpness.
- **Non-slip, hand-fitted handles** facilitate precise cuts.

Cable Clear® Cleaning Solution removes cable floodant, c-cement, filling compounds, grease, asphaltic coatings, and other petroleum-based materials from cables, fiber optic tubes and cladding, equipment, and tools.

CABLE CLEAR

RTH Ratchet T-handles – for optional use with any SCT or AIO tool – establish greater positive torque in the coring direction. Available in 4.5" and 8" lengths.

RTH-4500

- **Lubricated one-way roller bearings** prevent the tool from rolling back.
- **Sure-grip handle** provides a firm grasp.

RTH-8000

RTH-8000	Ratchet T Handle – 8"

The GATOR center conductor cleaner is unlike any other in that it is equipped with a beveler that eliminates the need for the cable technician to perform a pyramid cut. Burrs that are not removed from the center conductor can damage the seizing mechanism of the connector and result in signal loss and downtime. The GATOR beveler removes all burrs with ease.

Fiber Applications

FOCUS® Fiber Optic Connector Insertion and Removal Tool

inserts and removes small-form-factor (SFF) connectors in high-density patch panels. Works with SC, SC2, MU, LC, and MTRJ connectors and different cables, including 2mm, 3mm, 1.6mm, jacketed, and 900um buffered cables.

- **Long tapered jaws** reach through congested enclosures, while supporting the cable and delicate fibers.
- **Integrated flashlight** facilitates navigation and illuminates individual ports and connectors. (Sold with standard AAA batteries included.)
- **Universal tips** firmly grasp the smallest connectors without disturbing adjacent connections.
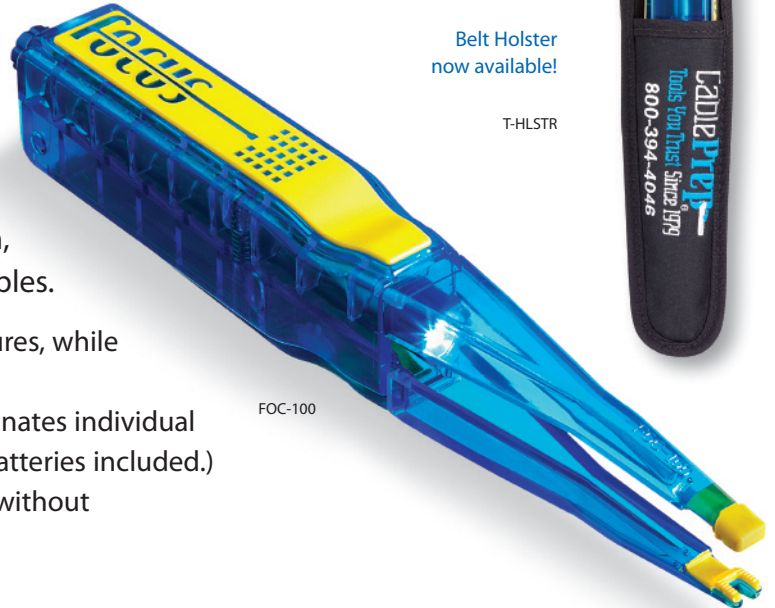

Belt Holster now available!

T-HLSTR

FOC-100

CPT Fiber Buffer Tube Cutters

cut back the tube to the proper length to expose the fibers on 3mm buffer tube.

- **Ergonomic design** makes the tool comfortable to hold and easy to operate with either hand.
- **Hardened tool-steel blades** ensure optimum performance over a long life.
- **Factory calibration** helps to ensure that cables are prepared properly.
- **Patented cleanout feature** automatically removes debris while stripping.

CPT-F10195

HCT/ACT Hex Crimp Tools

for fiber applications crimp connectors requiring hex sizes .065" through .213" onto fiber cables. Available with steel (HCT) or lightweight aluminum (ACT) frame.

- **Hex sizes stamped on tool jaw** facilitate picking the right tool.
- **Easy-adjustment nut** ensures precise and consistent results.

Because it's a jungle in there!

The FOCUS® Fiber Optic Connector Insertion and Removal Tool gets you in and out without creating a disturbance!
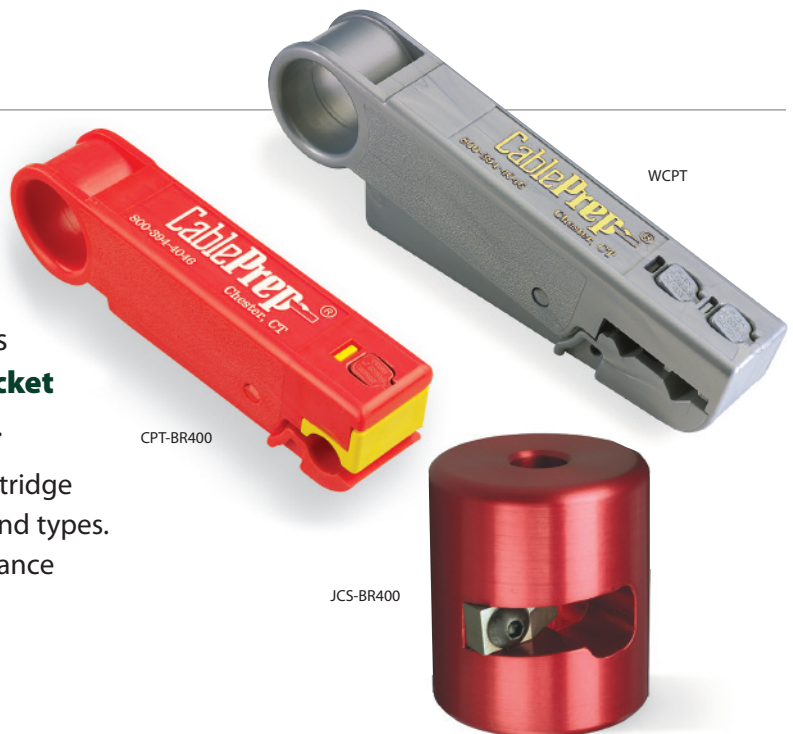

Wireless Applications

MSS Mid-span Jacket Strippers remove the jacket from a section of installed 50-ohm wireless cable, so that grounding straps can be attached. Work on annular, helical, braided, and smooth-walled cables.

- **Clean-cutting blade** protects the soft outer conductor, to maintain the structural integrity of the cable.
- **Locking handle** prevents the tool from falling off the cable during use.

MSS-BR400
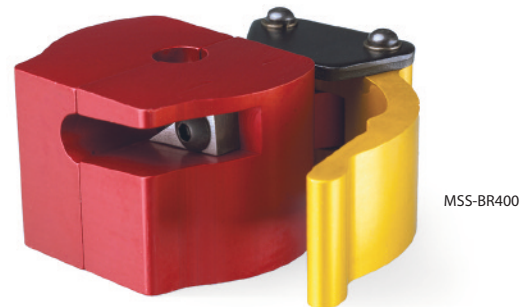

CPT and WCPT™ Wireless Cable Strippers cut the outer conductor and dielectric to the proper length to expose the center conductor on Andrews Braid Replacement (BR) helical 50-ohm .300", .400", and .600" cables and Trilogy AP and AQ cables. **JCS Wireless Jacket Strippers** strip back the jacket on these cables.

- **WCPT holds two cartridges** to reduce the need for cartridge changes when working on different cable sizes and types.
- **Hardened tool-steel blades** ensure optimum performance over a long life.
- **Plastic CPT and WCPT bodies and anodized aluminum JCS body** endure the harshest elements.

WCPT

CPT-BR400

JCS-BR400

HCT/ACT Hex Crimp Tools for wireless applications crimp connectors requiring hex sizes .212" through .429" and center pins requiring crimp sizes .050" to .174". Available with steel (HCT) or lightweight aluminum (ACT) frame.

- **Hex sizes stamped on tool jaw** facilitate picking the right tool.
- **Easy-adjustment nut** ensures precise and consistent results.

Maintenance Kit for HCT & ACT Series Hex Crimp Tools

MK-1050	Hex Crimp Tool Maintenance Kit

Headquartered in Chester, Connecticut, Cable Prep was founded in 1979 as Ben Hughes Communication Products Company. Since that time, Cable Prep brand tools have been setting the industry standard for performance, reliability, and ease of use.

Our mission is to provide the best tools for installing telecommunications systems, and we offer a full product line that includes stripping, coring, crimping, cutting, and cleaning tools for drop-cable, hard-line, fiber, and wireless applications. Renowned for their precision and superior quality, all Cable Prep brand tools are designed, assembled, tested, and factory calibrated at our Chester facility to meet the exacting standards of a broad range of cable and connector manufacturers.

To serve our worldwide market, we sell our products through a network of authorized Cable Prep distributors in the United States and more than 20 other countries.

CablePrep®
Tools You Trust Since 1979

INTERTEK
ISO 9001:2000

Tools You Trust® designed for every cable preparation

Cable Prep offers an extensive line of tools for hard-line, drop-cable, fiber, and wireless applications.

Since 1979, tools designed and manufactured by Cable Prep have been making quality connections throughout the world.

Quality tools ensure quality performance

Lightweight and compact, Cable Prep brand tools are ergonomically designed to operate easily and perform well, even under the harshest conditions.

Learn more about Tools You Trust

To get more information about our products and distributors, call us directly, or visit our website, where you can view, download, and order full-color product briefs.

For technical support, call us directly, or visit our website for step-by-step instructions and an online video demonstration of how to use and maintain our tools.

Warranty

All Cable Prep brand tools are warranted to be free from defects in workmanship and material. Plastic bodies have a lifetime warranty, and metal bodies have a limited lifetime warranty. Blades on stripping/coring tools have a one-year warranty.
